

Industrial Floor Cleaning Product Guide

Product	Description	Size
Multiscrub	A versatile medium duty economical low foaming alkaline cleaner recommended for use in daily maintenance cleaning operations through scrubber dryer equipment. Its lower alkalinity makes it particularly suitable for use on sensitive floor substrates.	5L 20L 205L 1000L IBC
Ultrascrub	An economy product for medium to heavy duty soiling. Low foaming alkaline formula capable of removing heavy oil/grease deposits in industrial operations. Excellent in food environments where fats, proteins and starches must be removed.	5L 20L 205L 1000L IBC
Neutrascrub	A highly advanced neutral water based semi quick-break degreasing product for cleaning operations in sensitive working environments where alkaline and more aggressive cleaners are undesirable or forbidden such as corrosion control areas. Practically no smell.	5L 20L 205L 1000L IBC
HD Powerscrub	A low foaming, extreme heavy duty, water based alkaline cleaner for use in remedial cleaning operations using scrubber dryer equipment. Excellent heavy duty emulsifier that can be used in most deep cleaning operations where an aggressive cleaner is required. Use with Remedial Floor Cleaner.	5L 20L 205L 1000L IBC
Remedial Floor Cleaner	A heavy duty low volatility, emulsifiable, semi quick-break solvent degreaser for impacted soiling and to remove difficult oils, grease, tar and bitumen from floors. Designed for use as a pre-cleaner on deep ingrained deposits prior to using HD Powerscrub or Ultrascrub .	5L
